

TABID panes table attribute

Posted by olaf212 - 2010/04/15 10:37

Hi,

Does someone knows what the TABID attribute corresponds to ? I trying to set the soil/land parameters directly using a spatial join as I have coefficients already available and I don't want do deal with thoses complicated soil maps...

So, The only field I'm not sure about is the TABID.

Thank's a lot

Oliver
